Code: 20EE4701B

IV B.Tech - I Semester - Regular Examinations - DECEMBER 2023

ENERGY CONSERVATION AND AUDIT (ELECTRICAL & ELECTRONICS ENGINEERING)

Duration: 3 hours Max. Marks: 70

Note: 1. This paper contains questions from 5 units of Syllabus. Each unit carries 14 marks and have an internal choice of Questions.

2. All parts of Question must be answered in one place.

BL – Blooms Level CO – Course Outcome

barriers to a more widespread adoption of renewable energy sources, and how can they be overcome? b) How does energy production and consumption impact the environment, particularly in terms of greenhouse gas emissions and air quality? OR 2 a) Explain in detail the various Energy L3 CO2 7 Marriage conservation schemes. b) What is the significance of reducing energy waste in homes and businesses for energy				BL	СО	Max. Marks
barriers to a more widespread adoption of renewable energy sources, and how can they be overcome? b) How does energy production and consumption impact the environment, particularly in terms of greenhouse gas emissions and air quality? OR 2 a) Explain in detail the various Energy L3 CO2 7 Marriage conservation schemes. b) What is the significance of reducing energy waste in homes and businesses for energy			UNIT-I			
renewable energy sources, and how can they be overcome? b) How does energy production and consumption impact the environment, particularly in terms of greenhouse gas emissions and air quality? OR 2 a) Explain in detail the various Energy L3 CO2 7 Not conservation schemes. b) What is the significance of reducing energy L2 CO1 7 Not waste in homes and businesses for energy	1	a)		L3	CO2	7 M
be overcome? b) How does energy production and L2 CO2 7 Moreon consumption impact the environment, particularly in terms of greenhouse gas emissions and air quality? OR 2 a) Explain in detail the various Energy L3 CO2 7 Moreon conservation schemes. b) What is the significance of reducing energy L2 CO1 7 Moreon waste in homes and businesses for energy						
b) How does energy production and L2 CO2 7 M consumption impact the environment, particularly in terms of greenhouse gas emissions and air quality? OR 2 a) Explain in detail the various Energy L3 CO2 7 M conservation schemes. b) What is the significance of reducing energy L2 CO1 7 M waste in homes and businesses for energy						
consumption impact the environment, particularly in terms of greenhouse gas emissions and air quality? OR 2 a) Explain in detail the various Energy L3 CO2 7 Not conservation schemes. b) What is the significance of reducing energy L2 CO1 7 Not waste in homes and businesses for energy						
particularly in terms of greenhouse gas emissions and air quality? OR 2 a) Explain in detail the various Energy L3 CO2 7 Not conservation schemes. b) What is the significance of reducing energy L2 CO1 7 Not waste in homes and businesses for energy		b)		L2	CO2	7 M
emissions and air quality? OR 2 a) Explain in detail the various Energy L3 CO2 7 Not conservation schemes. b) What is the significance of reducing energy L2 CO1 7 Not waste in homes and businesses for energy			consumption impact the environment,			
OR 2 a) Explain in detail the various Energy L3 CO2 7 M conservation schemes. b) What is the significance of reducing energy L2 CO1 7 M waste in homes and businesses for energy			particularly in terms of greenhouse gas			
2 a) Explain in detail the various Energy L3 CO2 7 Not conservation schemes. b) What is the significance of reducing energy L2 CO1 7 Not waste in homes and businesses for energy			emissions and air quality?			
conservation schemes. b) What is the significance of reducing energy L2 CO1 7 M waste in homes and businesses for energy			OR			
b) What is the significance of reducing energy L2 CO1 7 N waste in homes and businesses for energy	2	a)	Explain in detail the various Energy	L3	CO2	7 M
waste in homes and businesses for energy			conservation schemes.			
		b)	What is the significance of reducing energy	L2	CO1	7 M
security?			waste in homes and businesses for energy			
~ ~ ~ ~ ~ J ~			security?			

		UNIT-II			
3	a)	What do you understand by matching	L2	CO1	7 M
		energy use to requirements? Give examples.			
	b)	Explain the following (i) Production Factor	L4	CO3	7 M
		(ii) Reference Year equivalent energy Use.			
		OR			
4	a)	Explain the following (i) Ultrasonic Flow	L4	CO3	7 M
		Meter (ii) Psychrometer.			
	b)	Explain areas that need to be focused during	L4	CO3	7 M
		pre-audit phase.			
				1	
		UNIT-III			
5	a)	List various advantages of PF improvement,	L3	CO4	7 M
		Cost benefits of PF improvement by			
		capacitor addition.			
	b)	Explain how fluctuations in plant voltage	L4	CO4	7 M
		can be overcome.			
	1	OR			
6	a)	How does efficiency loss occur in a	L2	CO4	7 M
		rewound motor?			
	b)	A 50 kW induction motor with 86 % present	L3	CO4	7 M
		full load efficiency is being considered for			
		replacement by a 89 % efficiency motor.			
		What will be the savings in energy if the			
		motor works for 6000 hours per year and			
		cost of energy is Rs. 4.50 per kWh?			

		UNIT-IV			
7	a)	What are the methods of capacity control in	L2	CO4	7 M
		reciprocating air compressors?			
	b)	Explain the key performance metrics used to	L3	CO4	7 M
		evaluate the efficiency and effectiveness of			
		compressors?			
		OR			
8	a)	Mention energy saving options in the fan.	L3	CO4	7 M
	b)	What are affinity laws as applicable to	L2	CO4	7 M
		centrifugal fans?			
		UNIT-V			
9	a)	What are the precautions to be taken in the	L2	CO5	7 M
		case of energy efficient motor application?			
	b)	Explain how maximum demand control	L3	CO1	7 M
		works.			
				<u> </u>	
		OR			
10	a)	Explain the primary applications and	L3	CO5	7 M
		industries where VSDs are commonly used			
		to improve energy efficiency.			
	b)	List and explain energy saving measures in	L4	CO5	7 M
		lighting system.
